**Most Frequently Used Abbreviations:**

**CT** | Cities and Territories (one of the three DINÂMIA'CET-Iscte Research Groups)

**DC-Iscte** | DINÂMIA'CET-Iscte

**FCT** | Fundação para a Ciência e a Tecnologia

**GEC** | Governance, Economy and Citizenry (one of the three DINÂMIA'CET-Iscte Research Groups)

**IL** | Innovation and Labour (one of the three DINÂMIA'CET-Iscte Research Groups)

**ITL** | Integrating thematic line

**RG** | Research group

**TL** | Thematic line

## 1. INTRODUCTION: CHALLENGES FOR 2022

Recently, several disruptions are making the study of the socio-economic and territorial transformations even more urgent and challenging. The biggest health crisis in decades had not yet been overcome when one of the most brutal wars, since the Second World War, broke out in Europe. These two disruptions have come on top of major challenges were already underway, such as combating climate change, inequality, or unemployment.

Meanwhile, the short-term consequences of the pandemics and the war (though access to raw materials and energy, rising costs of living, disruption in production and supply chains, etc.) reinforce the questioning about the adequacy of the current model of economic and social organization, as well as about the impacts of technological change and digitalization. These complex problems, with multiple scales and dimensions, pose challenges to social change analysis, for which the multidisciplinary approach used by DINÂMIA'CET-Iscte (DC-Iscte) is particularly relevant. This scenario also forces us to reassess the general approach of the DC-Iscte, as expressed in several programmatic documents (strategies, concepts of social change, collective books, etc.), in order to better interpret the matrices of the social transformations in progress, including the drivers, obstacles and actors of change.

The evolving international context affects the major scientific challenges faced by DC-Iscte researchers. It powerfully turbocharges the critical challenges that were becoming pressing in the last decades, such as the vital need for an ecological transition and the importance to regulate the digital transition. This context reflects in the work of the thematic lines of the three Research Groups (RG's), as well as in the three Integrating Thematic Lines (ITL). If the environment is to be preserved, consumption patterns must evolve, including those of the wealthiest households (which are responsible for an important share of greenhouse gases emissions). This calls for a thorough reduction of social inequalities. Since these inequalities are primarily decided within the sphere of work, profound changes in the world of work, that go beyond industry restructuring and reskilling, are required.

The close interconnection between these challenges reinforces the relevance of the multidisciplinary approach and the mobilization of the three ITL's in particular. This will contribute to discuss the synergies at work between ecological and technological changes, the regulatory and governance processes demanded, and the large extent in which the appropriate policies and measures are to be thought and implemented at the territorial level.

The DC-Iscte Action Plan projected for 2022 already reflects these challenges, especially in view of scientific events, with most of them resuming the face-to-face model. Two major conferences will be held in Lisbon hosted by DC-Iscte; the Global Meeting on Law and Society | Rage, reckoning & remedy, in July, and the 18th European Conference on Management Leadership and Governance (ECMLG), in November. Hundreds of researchers are expected to participate in these events,

which will contribute to strengthening the research being done in the unit, especially under the Governance, Economy and Citizenry Research Group (GEC), and the Innovation and Labour Research Group (IL).

Within the scope of the IL Research Group, the further development of the agenda proposed by the recently created Youth Employment Observatory (Observatório do Emprego Jovem) should be highlighted. The Observatory has been achieving great visibility for the various aspects related to youth employment and a significant reinforcement is expected in 2022.

Housing and related issues in the scope of public policies and socio-territorial experiences is another major theme that has gained a new prominence in the Cities and territories Research Group (CT), with the recent launch of the open data platform LXHabidata. Along with the permanent data updating and the inclusion of new variables, the strategic objective of this research tool includes the constitution of a scientific Observatory dedicated to Housing issues, which is still expected to be set in motion in 2022. The need for funding is one of the main challenges to overcome in order to achieve this goal.

From the beginning of 2022 the DC-Iscte became the hosting unit for ongoing projects carried over from ISTAR-Iscte (both collective and individual research projects), due to the voluntary transfer of researchers (with and without Phd), now integrated in the DC-Iscte. These projects - mostly in the fields of participation and participatory practices, contemporary urban social movements, urban governance, and digital architecture - will reinforce the activity and the existing skills in CT Research Group (particularly within the Thematic Line 5 - Territorial governance, spatial planning and socio-spatial intervention). This will also be an opportunity to strengthen interdisciplinary work within this Research Group, as well as to promote the articulation with civil society and foster new mechanisms to amplify the social impacts of the research conducted in the DC-Iscte.

Section 4 of this Action Plan provides a more complete information on the expected outcomes and outputs pointed by the DC-Iscte's body of researchers. Apart from the several new projects to be initiated, it is important to stress all the invisible work involved in preparing the project proposals submitted for funding and waiting for results, a major investment by all Research Groups in the first quarter of the year. A few more are expected throughout 2022. DC-Iscte actively encourages its researchers to expand the search for funding through project applications in order to overcome the public under-funding of science, with more funding applications and to different sources. The results of this strategy have been quite satisfactory compared to other research units of ISCTE, for instance.

2022 will also be marked by the election of a new team to lead DC-Iscte, as well as a new team for the Scientific Committee. Both will have the challenging responsibility of continuing to best guide a research unit that has been building a considerable and recognized scientific legacy, as well as to prepare the international research units' evaluation, that is expected to start at the end of this year.

At the institutional level, the DC-Iscte will interact with a new entity. The newly created Sociodigital Lab for Public Policies will begin moving forward with its goals at the institutional level, creating new synergies between researchers from various units of ISCTE, namely through applications to larger European funding programmes. In a certain way, the Sociodigital Lab seeks to replicate at an institutional scale the cross disciplinary dialogues that DC-Iscte pursues through its three Integrating Thematic Lines. There is no doubt that in both scales of action there are many challenges to be faced by a transversal perspective over the emerging issues currently in debate. As an example, the *Regenerative Territories for Carbon Neutrality* is the Sociodigital Lab's Thematic Line 1 (of five), and the one with a higher representation of researchers of DC-Iscte, namely from the CT research Group. Also under the institutional commitments made by the Sociodigital Lab, two permanent research positions will be created at DC to hire assistant researchers via an international recruitment call.

In order to reinforce the investment in the prospection of funding opportunities in DC-Iscte research areas and to promote greater cross-disciplinary articulation between the internal groups and lines of research, more two assistant researchers will be hired to help in these functions, starting their work in June 2022, after a long recruitment process via international call started in 2021. The evaluation of the social and scientific impact of the research developed at DC-Iscte will also be one of the tasks to be carried out within the scope of these hiring procedures, in order to fill a previously identified gap.

Still regarding labour gaps, it is important to underline the need to reinforce the technical staff, in order to guarantee the proper support to research activities and project management. In mid-2021, and due to a more competitive job offer, the DC-Iscte lost its sixth staff member, whose functions covered project management. This need remains unmet, despite the efforts made to overcome this situation. For a research unit that is still growing in number of researchers and activities, it has been particularly challenging for a support team of five people to provide adequate responses to all requests. As such, it is also important to acknowledge the work and dedication of the DC-Iscte staff in carrying out the planned activities presented in this Plan.

Only a few of the activities and challenges foreseen for the current year of 2022 were briefly highlighted. A fuller reading of the Action Plan will provide a clearer idea about a very dynamic research Unit, actively responsive to the many challenges of contemporary times. Nevertheless, the traditional structural activities of DC-Iscte will continue to be carried out, namely that of reflecting about the conditions of our research activity, forms of organization, communication, publishing, teaching, producing knowledge, and enquiring about the perception of our mission as scientists. This includes the ethical issues and going beyond the simplistic metrics that often tend to oversimplify the scope and richness of individual and collective scientific work at a research unit.

Following the Introduction, the Section 2 remembers the identity and organizational aspects of DC-ISCTE. Section 3 presents the strategic goals foreseen to 2022, which are detailed by research Group in Section 4.

## 2. DINÂMIA'CET-ISCTE SCIENTIFIC IDENTITY AND ORGANIZATION

### 2.1. DINÂMIA'CET-ISCTE SCIENTIFIC IDENTITY<sup>1</sup>

**DINÂMIA'CET-Iscte (DC-Iscte), Centre for the Study of Socioeconomic Change and the Territory** is an Iscte interdisciplinary research unit in social and human sciences, which combines fundamental and applied research on relevant economic, social and cultural topics.

We perform advanced international and comparative research, framed by a sustainable development approach, while pledging to increase knowledge about dynamics and changes of Portuguese society.

We seek to contribute to the understanding of the contemporary world and to the design of the future through the analysis of contexts, actors and consequences of change, encompassing a particular focus on public policy and institutional frameworks, on an analytical and a normative level.

DC-Iscte mobilizes an array of theoretical and methodological resources guided by a shared core issue. What is at stake is to capture the nature of the dynamics underlying socioeconomic and territorial change, their genesis in the inter-play between collective public and private actors operating in different domains (e.g. markets, territorial communities, public spaces), as well as their impact, notably in spatial terms (landscape, morphology, etc.).

Researchers at DC-Iscte pay particular attention to individual action (choices, expectations, creative insights, emotions, etc.) and to institutional endeavours stemming from states as well as sub-, inter- and supranational bodies to moderate, boost or restrain such action.

Research focused on the evaluation of the consequences of such institutional regulation is also based on a reflexive analysis of our own domain of activity - scientific research, its relationships with its context and the changes it goes through, in line with DC-Iscte's strategic objective to promote the self-reflexivity of its researchers.

---

<sup>1</sup> Unchanged since Activity Report 2018.

## 2.2. ORGANIZATION AND ACTIVITIES<sup>2</sup>

DC-Iscte gathers researchers from a wide range of academic backgrounds (economics, sociology, law, architecture, regional and urban planning, anthropology, geography, management, quantitative methods, etc.). It is organized in three research groups (RG):

- i) Innovation and Labour (IL);**
- ii) Cities and Territories (CT);**
- iii) Governance, Economy and Citizenry (GEC).**

Each RG has specific research programmes, drawing upon medium-term thematic lines of analysis, which reflect their particular scientific identity<sup>3</sup>. Consistency across the three RG's is promoted through three Integrating Thematic Lines (ITL) set to boost synergies among the groups.

The ITL's of DC-Iscte were conceived as an organizational instrument serving the development of advanced research on social change. They are based on a differentiated conceptual network attempting to grasp the plurality of dynamics intermingled in concrete processes of social change. Their ambition is both to better understand such processes and to supply knowledge likely to be mobilized in the efforts of controlling or reorienting them. Thereby this initiative aims to boost interdisciplinary research on sustainable transitions, in response to the Sustainable Development Goals (SDGs).

The interdisciplinary collaborations between the different research fields of the three RGs of DC-Iscte should allow exploring the meaning and relevance of central concepts (such as creativity, participation, empowerment, innovation, regulation, governance, complexity and sustainability) in order to develop strategies capable of investigating them critically, and at the same time involving them in collective research strategies that address the wider challenges of the Unit. This means fostering interconnection and synergy between existing (individual and collective) projects, and stimulating discussion and internal reflection, which may result in a more active intervention and the launching of new research initiatives. It should help on the design of novel proposal at national and international level, and to develop fruitful collaboration with other research Units, as well as with institutions and local communities.

<sup>2</sup> Unchanged since Activity Report 2018.

<sup>3</sup> Additional information about the specific scientific identity of each of these groups, as well as about their main goals and achievements can be found in the Scientific Report 2020.

### **Integrating Thematic Lines**

**(i) Innovation and Transition to Sustainable Societies**

**(ii) Regulatory and Governance Challenges for Complex Societies**

**(iii) Creative and Participative Lives in Empowered Societies**

Activities taking place at DC-Iscte combine research with service provision to the community, and advanced training (masters and PhD programmes). The Unit is invested in the articulation between teaching and research, according to international higher education standards. It nurtures the transfer of scientific knowledge through seminars, conferences and publications. It also promotes internal debate and collegial co-operation in order to favour theoretical and methodological cross-fertilization between its different projects, and to foster collective learning and capacity for organizational adaptation and innovation. Its members share the belief that public universities should produce knowledge that may underpin the public debate, namely the debate about public policy design and implementation.

DC-Iscte publishes an online journal, *CIDADES, Comunidades e Territórios*, and a Working Paper series, both peer-reviewed. It also participates in publishing *Portuguese Journal of Social Science*

These activities are supported by a close-knit network of partnerships with other national and international research units, public agencies and civil society players.

### **Research Groups and Thematic Lines**

#### **Innovation and Labour (IL)**

##### Thematic Lines:

1. Innovation
2. Labour

The general theoretical framework of the IL Research Group is that sustainable growth comprises environmental, economic, social and political dimensions that have to be dealt with in an interrelated manner. The current growth regime is undermining some of its own major pillars, such as the responsible use of natural resources and social cohesion. Pandemics and climate crises have revealed that mainstream economic theories and conventional approaches have not been able to deal with these two issues and the challenges they put to our societies.

The group is focused on two interdependent domains (Innovation and Labour) and their interconnections.

Regarding Innovation, IL works on the transition to sustainability of large sociotechnical systems, like the energy and food systems, and the decarbonization of economic activities. It also studies the emergence, development and diffusion of scientific and technological knowledge and innovation and the patterns of spatial diffusion of new technologies, namely renewable energy technologies. The other main topics of research are: the formation and deployment of knowledge-intensive firms, academic spin-offs, start-ups and others; the intellectual capital management; impacts of technological change; and the emergence and role of actors, values, norms, policies and forms of governance in these processes.

Regarding Labour, IL works on contemporary labour market issues in Portugal and the EU. The research agenda draws on a multidisciplinary approach, combining sociology, political economy, industrial relations, management studies and social psychology, and using qualitative and quantitative methodologies. The agenda addresses issues associated with sources and consequences of stratification and inequality; and with intervention of state and social actors in the labour market. The research topics are: education and skills; work and job quality; telework and working conditions; unequal treatment of categories of workers; youth employment and unemployment; traditional and new vulnerable workers; trade unions and labour market regulation.

Methodological pluralism is a key feature of this Group. It combines qualitative and quantitative approaches; uses innovative data analysis techniques to deal with both approaches (e.g. social network analysis, fsQCA and fuzzy cluster analysis), and deploys the appropriate econometric tools to analyse the datasets. Another key feature is the combination of theoretical work with empirical research, drawing on comparative analysis.

## **Cities and Territories (CT)**

### Thematic Lines

1. Creativity, culture and territory
2. Representations and discourse on architecture and territory
3. Ways of Living, Society and Architectural Culture
4. Recompositions, metropolitan change and housing
5. Territorial governance, spatial planning and socio-spatial intervention
6. Urban Morphology and Sustainability

This Group focuses its research on the territorial dimensions of contemporary socioeconomic, environmental and cultural change, analysing its complex restructuring mechanisms in light of their spatiality, i.e. their territorial embeddedness and their spatial-morphological dimensions, framing them with a view to acting towards the promotion of multidimensional sustainable development processes.

The deep restructuring processes that affected the organization of socioeconomic and physical systems since the 1970s, and their technological and socio-cultural drivers, raising the centrality of informational, cognitive and symbolic contents to these processes, brought new challenges to the way we conceptualize, empirically analyze, plan and develop public policies for urban and rural territories. The complexity of movements and rationalities behind centripetal and centrifugal dynamics that affect urban systems and the organization of metropolitan spaces today also raise new questionings and challenges to the ways cities are shaped and planned and how academics can propose ways to understand and act in increasingly complex systems and develop tools to promote their resilience. This research group invests in the disentangling of these processes, through a variety of themes (e.g., the urban form, creative dynamics, ways of inhabiting, recomposition processes, urban representations, among others) and empirical contexts (from the in-depth analysis of Portuguese metropolitan areas and cities, to comparative analysis with European or Lusophone cities, for example), favoring an interdisciplinary perspective which is nurtured by the diversity of this research group.

The Cities and Territories Research Group's strategy for deepening knowledge about the dynamics of change in these spatial and territorial terms is based on the acknowledgment of the diversity of logics, processes and actors that produce and appropriate these processes. This is always done from a triple perspective, involving (i) the analysis of the "dynamics" themselves; (ii) the understanding of the regulation and planning issues and the aspects related to urban/territorial action and "policy-making"; and (iii), a "reflexive" consciousness of the way these spaces are worked and how they are studied.

This encompasses a permanent concern with the deployment of new planning methodologies and ideas in urban and social policy design, often based on research-action processes, and fostering the creation of useful knowledge to facilitate agents' action and policy-making, concerning urban planning and regional/local development strategies in Portugal and elsewhere, and providing public officials and community leaders with new tools for management and policy analysis.

The research group is also committed to the development of new methodologies to disseminate research results to society and to consolidate bridges between academia, policy makers and civil society.

## **Governance, Economy and Citizenry (GEC)**

### Thematic Lines

1. Human Rights, Markets and Governance Challenges
2. Reflexivity, Communication, and Social Responsibility of Science

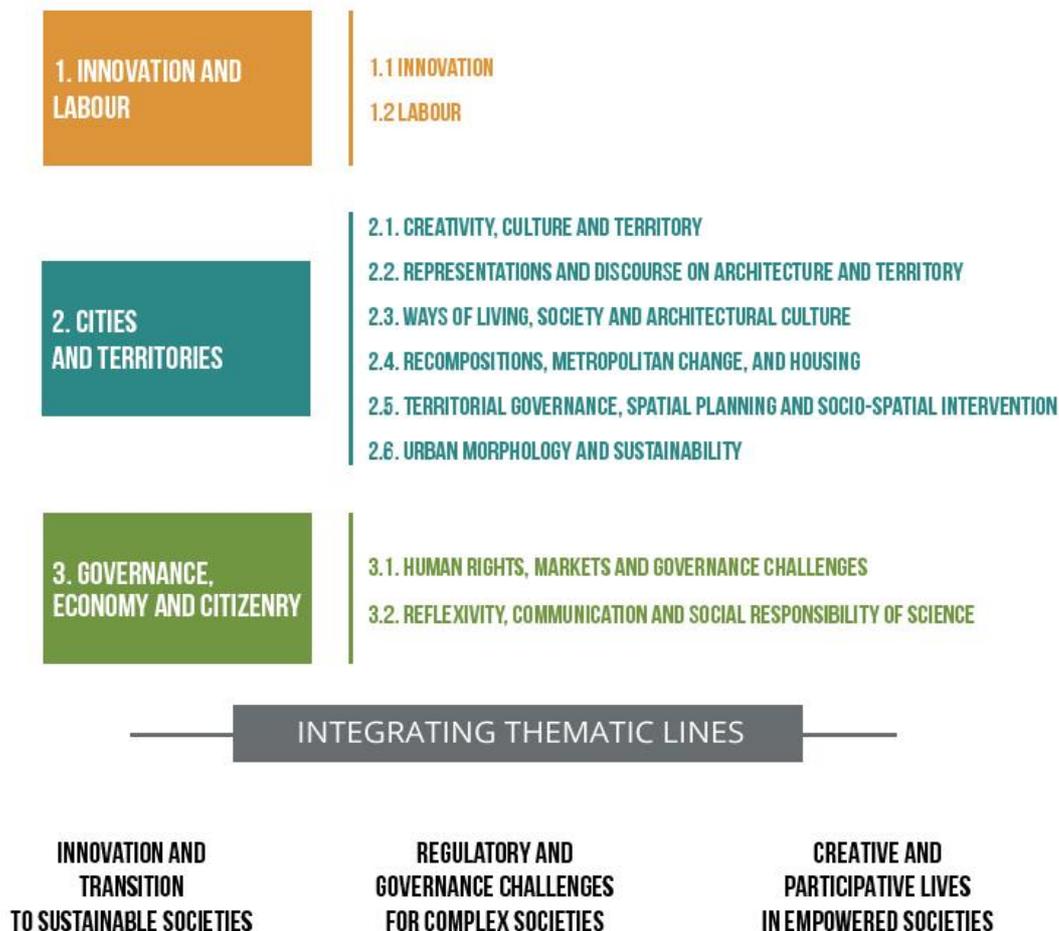

This Group focuses its research on the modes of regulation and governance, encompassing the state's intervention, markets and forms of collective action in the context of Europeanization and globalization trends. It is assumed that, in addition to the means used by governments to guarantee the rule of law and to promote public policies, new forms of public and private regulation are becoming increasingly relevant, based on co-operation, self-regulation and mobilization of social actors. Both formal modes and processes of regulation, including the legislative procedure, as well as "soft" law-making and informal modes of social and economic (market) regulation are studied, with special attention to their impact on the citizens' individual rights and capacity of action, which they can promote or hinder. Along this vein, the articulation between (economic and legal) discourses, ideas, forms of communication and political decision making gains a new salience. Among the domains under scrutiny are environmental and public health risks, the digital era, financial markets and social policies.

This Group also provides a framework for research on science communication and public engagement, as well as the role and social responsibility of science and its actors, including researchers and research institutions, all of them increasingly asked to participate in regulatory processes. This is in line with the Centre's strategic objective to promote the self-reflexivity of its researchers in order to better serve society. Economics has been especially concerned by this endeavour, but other scientific disciplines of relevance to the Centre – namely architecture and law – have started similar lines of work.

In more concrete terms, the Centre's strategic objective to promote the self-reflexivity of its researchers will be pursued throughout the development of a meta-theoretical and methodological enquiry aiming to address the topics about inter/transdisciplinary and collaborative research and the social impact of research. The preliminary conclusions of this enquiry will be presented in an internal seminar, open to all Centre's researchers, to happen in November. It is foreseen that the hiring of a researcher with the specific responsibility of coordinating information management in the unit and enhancing inter-groups and inter thematic line articulations (also in 2022) will contribute also to also this process.

Taking advantage of inputs from economics, jurisprudence, sociology, political science, architecture and computer science, these Research Group's thematic lines follow up from this backdrop, sustained by work developed in recent years at the Centre under projects IA, RECON, MORE-PE and Open-Ec.

**Figure 1. Research Groups and Thematic Lines**

### 3. Strategic Goals for 2022

DINÂMIA'CET-Iscte (DC-Iscte) strategic goals have been designed on the basis of its legacy of theoretical and empirical research, and accumulated experience of co-operation with other national and international research units, as well as a history of collaboration with public entities and civil society since it was founded.

Generally, major goals defined in its mid-term Strategic Plan (submitted to FCT within the framework of the assessment process and funding application for the period of 2018-2022<sup>4</sup>) bind DC-Iscte:

- to research work on cross-cutting and comprehensive topics addressing the key dynamics of contemporary socio-economic and territorial change and the inherent challenges to regulation and governance;
- to the mobilization of its researchers towards innovation in research and communication methods, for intra- and interdisciplinary dialogue, along with strengthened co-operation with their national, foreign and international counterparts in research;
- to greater openness to society.

This general strategic framework for the period of 2018-2022 (meanwhile considered the backbone for the funding programme from FCT for 2019-2023) becomes the structural background framework for the 2022 activity plan, and can be translated into a set of goals which are transversal to the **three main level of objectives that guide the unit's scientific and operational strategy**:

1. Main scientific objectives to be pursued by the Unit – addressing the mission and collective scientific identity of DC-Iscte and its research programmes; the scientific objectives pursued by each Research Group (RG) and respective Thematic Lines; the objectives pursued by the Integrating Thematic Lines (ITL);
2. Main mid-term operative goals linked to the Unit's Strategic Plan – addressing the Unit's development and the expected activities for 2022;
3. Specific goals established for 2022 – addressing short term objectives planned for implementation in 2022.

Table 1 presents, in a transversal and summarized way, the activities referring to the main goals to accomplish through the three levels of scientific and operational objectives that guide DC-Iscte Strategic Plan. Most of them correspond, to actions already underway and which require continuity. Others,

---

<sup>4</sup> A brief overview of the main strategic goals and features for the period 2018-2022 can be consulted at DC-Iscte website: <https://www.dinamiacet.iscte-iul.pt/research>

## 4. Main Goals for 2022 by Research Group

### 4.1. INNOVATION AND LABOUR (IL)

This Research Group aims to study two interdependent domains (Innovation and Labour Thematic Lines) and their interconnections. Sustainable growth comprises environmental, economic, social and political dimensions that have to be dealt with in an interrelated manner.

The major challenge is to foster interconnectedness between subjects related to innovation and labour issues in the current context of energy transition and digital transformation. The expansion of digital platforms work and telework are examples of the intertwining of the two domains. Other example is the effect of climate mitigation and of the decarbonization of the economic activity on employment, i.e., the climate jobs.

Research continues to stand on methodological pluralism trying to integrate social sciences with technical tools to properly explore the impacts of technological change. Multiple research methodologies, qualitative and quantitative approaches will continue to support empirical analysis of the Research Group members.

Previous research has proven that different tools of multivariate data analysis are suitable for the subjects and empirical analysis of the Group research agenda. Therefore, it is expected that the fsQCA, fuzzy cluster analysis, as well as econometric tools will continue to be used to examine national and international datasets. In addition, case studies and surveys for collection of primary information will be used, as well as social network analysis to study the relationships established by actors. Comparative analysis continues to be a key strategy of this Research Group.

In addition to publication and dissemination activities specific to each Thematic Line (Innovation and Labour), the Research Group members will participate in the 6th Workshop of DINÂMIA'CET-Iscte to be held in April 2022, as well as other transversal activities of DINÂMIA'CET-Iscte.

Likewise, they will deepen collaboration with other research centres, from both ISCTE and elsewhere in Portugal and abroad. Therefore, an increased participation at international projects, namely European projects, is an objective of this Group, whose members have a long-lasting tradition of international collaboration and networking.

Finally, the Group wishes to participate in projects launched at ISCTE and elsewhere to study the long-term impact of the COVID-19 pandemic on the living and working conditions; the challenges posed to national health and care

systems; and the way digital technologies are fostering homeworking, digital platforms, remote teaching and research.

## **Thematic Lines**

### **1. Innovation (Coord: Isabel Salavisa)**

The Innovation team members will continue to work on topics related to: the creation and diffusion of scientific and technological knowledge and innovation, namely in renewable energies, additive manufacturing and other; the creation of knowledge-intensive firms, academic spin-offs and others; the transformation of large socio-technical systems, like the energy system and the food system in the transition to sustainability, and the decarbonization of economic activities; the role of actors, values, norms, policies and forms of governance in these processes; and intellectual capital management.

The team will continue to study the impact of digital transformation on skills and the role of different players in developing digital skills (jointly with Labour team researchers); the effect of the energy transition and decarbonization on the transformation of the different sectors of the economy and lifestyles; and copyright protection in additive manufacturing with blockchain.

Most of the research draws on empirical analysis, resorting to different quantitative and qualitative techniques – econometrics, case studies and social network analysis – and a large array of data, both primary and secondary.

More specifically, the team members target the following theoretical and empirical goals:

#### **1. Creation of scientific and technological knowledge**

Through the study of the creation, dissemination and use of knowledge in emerging technological areas, such as renewable energies (wind, solar and ocean-based), social and technological innovations in energy demand (e.g. in buildings, transport) and additive manufacturing.

#### **2. Dissemination of knowledge**

With the study of the entrepreneurial performance of academic spin-offs and the role of academic spin-offs as intermediators between higher education organizations and business.

#### **3. Impact of innovation**

With the study of the impact of innovation on society and economy, namely green technologies, additive manufacturing, artificial intelligence and robotics.

#### **4. Transitions to sustainability**

Regarding the study of the transition of the energy system and of the food system in a comparative perspective; and the decarbonization of the economy.

#### **5. Intellectual capital management**

Through the development of this methodology to foster application to the strategic management of organizations and cities, and the study of its relationships with innovation and sustainability.

Team members will be engaged in dissemination through traditional channels (scientific conferences, papers, articles, book chapters and the publishing of an international book), but also through the organization of the ECMLG - 18th European Conference on Management Leadership and Governance, to be held in Iscte, in November 2022.

## **2. Labour (Coord: Fátima Suleman)**

Contemporary labour market issues are the major concern of this research team. The proposals for future research show a certain continuity and a strategy towards the further development of this research. The team aims to study digital skills formation; unemployment and regulations; and labour market segmentation. These issues involve a multidisciplinary approach to examine labour market regulations, individual-based outcomes, as well as firms' decisions regarding their human resources.

Research members attempt to combine qualitative and quantitative data, using appropriate data analysis tools. Furthermore, the members attempt to reinforce the comparative perspective drawing on international datasets available to researchers, often trying to extend previous research to more countries.

Team members are engaged in dissemination through traditional channels (scientific conferences, papers, articles, book chapters). The activities of the Youth Employment Observatory are particularly significant for this purpose.

Post-graduate courses will continue to be a fruitful channel to further explore some particular topics (e.g. training policies for young graduates; authority and co-operation; graduates in non-graduates' jobs). Often, master and PhD students integrate ongoing research projects.

More specifically, the team members target the following theoretical and empirical goals:

### **1. The quality of work and jobs**

- Re-examining theoretical models of firms' behaviours and their impacts on the quality of working life;
- Examining the firm-level and individual-level drivers of job quality and vulnerable workers (e.g. older workers, women; young workers) in a comparative perspective using international datasets;
- Examining the employment conditions of higher education graduates in the context of expansion and economic recession in EU countries;
- Examining how digital work contributes to degrading the quality of work and increased unemployment;
- Examining how financialization of the economy affects labour market outcomes;
- Examining the impact of country-level characteristics on workers categories.

### **2. Skill requirements in the labour market**

- Analyzing the skills required from higher education graduation;
- Contributing to the debate on graduate and non-graduate jobs in the context of higher education expansion;
- Examining employability strategies of higher education institutions;
- Analyzing how firms acquire or develop skills.

### **3. Labour market regulation**

- Analyzing the collective bargaining systems in Europe;
- Exploring the challenges of Unions in the context of labour market flexibility and Uber-like employment relationships;
- Examining changes in labour legislation and collective bargaining;
- Examining labour legislation for specific categories of workers;
- Examining the role of regulations on firms' decisions regarding the employment relationship.

### **4. Firms' social responsibility**

- Examining the relationship between corporate social responsibility and employees' behaviour;
- Examining factors that affect firms' attractiveness.

## **II Expected Achievements for 2022**

### **New projects to start in 2022**

- ABC Collaborative Laboratory: Integrated Aging and Rejuvenation Solutions. Proponent: Associação para o Desenvolvimento do Centro Académico de Investigação e Formação Biomédica do Algarve; PI: Clévio Nóbrega. DC team: Sara Ramos, Ana Brochado, Gustavo Sugahara. Funded by FCT, to start in 2022.
- CATALYST: European VET Excellence Centre for Leading Sustainable Systems and Business Transformation. Leader: Institute for Research in Environment, Civil Engineering and Energy; PI: Angelina Veshoska. DC team: Florinda Matos. Funding source: European Commission (ERASMUS+). ISCTE budget: €269.143,21, to start in June 2022.
- Crises e Mercado de Trabalho: Tornar o Emprego Jovem mais Resiliente a Choques Económicos. ISCTE, Observatório do Emprego Jovem, funded by Presidência da República Portuguesa. Fátima Suleman (PI); Paulo Marques (Co-PI) (LT2).

### **Collective Projects (ongoing)**

- REVAL: Da desvalorização interna à revalorização do trabalho: o caso de Portugal, Coord. M. da Paz Campos Lima (LT2);
- BRIGHET: Bringing together Higher Education, Training, and Job Quality, Coord. F. Suleman (LT2);
- EDITS - Energy Demand changes Induced by Technological and Social innovations – Rede do projeto EDITS, RITE, DC Team: N. Bento (LTI);
- EurWork - Information Reporting Services: quality of work and employment, industrial relations and restructuring and management of changes – Portugal, DC-Iscte, Coord. R. Naumann (LT2);
- KM3D - Knowledge Management in Additive Manufacturing: Designing New Business Models, DC-Iscte, Coord. F. Matos (LTI);
- Mercado da contratação pública de inovação em Portugal, DC-Iscte, Coord. C. Sousa and N. Bento(LTI);
- OceanTrans: O potencial transformador das energias oceânicas, DC-Iscte, Coord: LNEG. Coord. Dinamia-CET Team: N. Bento (LTI);

- Sus2Trans - Transições Transformativas Sustentáveis - Conciliar a Aceleração das Transições para Baixo Carbono com Transformações do Sistema, DC-Iscte, Coord. N. Bento (LT1);
- SOLID-JOB - Reconstruir a solidariedade numa era de dualização do emprego, DC-Iscte, Coord. Paulo Marques (PI) and Helena Lopes (Co-PI) (LT2);
- Youth Employment Observatory, DC Iscte, Coord. Paulo Marques and Fátima Suleman (LT2).

### **Project proposals submitted for funding awaiting results**

- “Womens'/Girls'Empowerment in Information and Communication Technologies: Problems and Suggestions” Pi: Senem Demirkiran - TRAKYA UNIVERSITESI Turkey Coordinator. DC team: Florinda Matos. Submitted to European Commission (HORIZON-CL2-2022-TRANSFORMATIONS-01).
- CONVERGENCE: Convergência digital e formação de inovações para melhorar as condições de vida e acelerar a descarbonização. Submitted to FCT.
- COEFFEECT: Empregos Climáticos e Transformação Económica em diferentes Cenários de Descarbonização. Submitted to FCT.
- EMPLOYGRAD - Estratégias para a empregabilidade no ensino superior: políticas, instituições e graduados. Proponent: ISCTE; PI: Pedro Videira; Co-PI: Cristina Stanca Sin. Submitted to FCT.

### **IL grant positions opening in 2022**

- 2 research grants (BA): Project: SOLID-JOB, January 2022;
- 1 research grant (MA)| Project: BRIGHET - Aproximar o Ensino Superior, a Formação e a Qualidade do Emprego, February 2022;

### **Research contracts (under individual and institutional “Scientific Employment”)**

1. Nuno Bento

### **Ongoing PhD theses in 2022:**

#### ***Funded PhD Projects (ongoing)***

1. Alexandre Mergulhão, The comparative political economy of top incomes. Phases of inequality in Portugal vs varieties of capitalism and Southern Europe, supervised by Paulo Marques, Iscte.

2. Bruno Oliveira, Basic income: insights from two policy making experiences – Barcelona and Utrecht, supervised by Fátima Suleman, Iscte

***Non-funded PhD Projects (ongoing)***

1. Ana Clara Cândido, Processo de Desenvolvimento e Difusão de Cloud Computing: Estudo sobre as Redes de Colaboração. Supervisor: Cristina Sousa, Iscte
2. Carlos Luís Tiago Levezinho, Artistic Professionalisation and Higher Education on the Labour Stage: the Case of Jazz Music in Portugal, Supervisor: Paulo Marques Alves; Iscte.
3. Cláudia Isabel Rêgo Gonçalves Vajão da Cruz Dias, Gestão do emprego nas empresas: evolução dos arranjos contratuais flexíveis em Portugal, Supervisor: Fátima Suleman
4. Cláudia Maria Mendes Torres Tomé, The Right to Disconnect – A Portuguese Perspective, Supervisor: Paulo Marques Alves, Iscte
5. Li Yanhui, Fatores que influenciam a intenção de saída dos trabalhadores farmacêuticos na China. Supervisor: Sara Ramos, Iscte
6. Luís Fernando Costa Baptista, Does accounting education based on system dynamics enhance the level of accounting knowledge?, Supervisor: Joaquim Eduardo Simões, Iscte
7. Luís Guerreiro, An institutional analysis of technological integration in the labour market: the digital platform work in Europe, Supervisor: Paulo Marques, Iscte
8. Nuno Miguel Madeira Beato Alves, Trabalho e Vida Quotidiana: um Estudo de Caso num Grande Centro Comercial de Lisboa, Supervisor: Paulo Marques Alves, Iscte
9. Patrícia Maria Gouveia Araújo, Voluntariado nas Organizações e Organizações de Voluntariado, Supervisor: Joaquim Eduardo Simões e Silva, Iscte
10. Ross Wallace, Socio-Technical Imaginaries of Future Energy Landscapes: How, when and where are renewable energy infrastructures acceptable?. Co-Supervisor: Nuno Bento, Iscte
11. Sandro Fonseca, Estratégia ambiental. Supervisor: Sara Ramos, Iscte

12. Tatiana Iolanda Pires Marques, Managing an ageing workforce through job design and fairness, Supervisor: Sara Ramos, Iscte
13. Wang Silang, Promoção do sistema médico hierárquico ao nível local através da relação universidade-hospital-comunidade - estudo de caso. Supervisor: Sara Ramos, Iscte

### Organization and participation in scientific events (planned)

Local	Name	type	Researcher
Iscte	Workshop Dinâmicas	Internal workshop	All DC
Iscte	ECMLG - 18th European Conference on Management Leadership and Governance	Conference	Florinda Matos
Iscte	Conferência final do projeto BRIGHET	Conference	Fátima Suleman
Iscte	Conferência sobre a Nova Lei do Teletrabalho	Conference	Glória Rebelo
NA	Resilience in a Digital Age: Global Challenges in Organizations and Society	Book launch	Florinda Matos
Azores	Seminário Final do Estudo "À Margem"	Seminar	Lídia Fernandes
Iscte	Garantia Jovem e Políticas de Emprego em Portugal: Promovendo o diálogo entre a universidade e os atores das políticas públicas	Seminar	Paulo Marques

### Planned publications

#### Scientific journal articles

- Baptista, L., Lourenço, I., & Simões, E. (2022). Accounting education: The effect of using the concepts of system dynamics. [submitted, under review]
- Conceição, O., Faria, A.P. & Machado, C.S. (2022). Duration models: determinants of research-based spin-offs survival. Procedia Computer Science. xxxxxxxx

- Conceição, O., Sousa, C. & Fontes, M. The role of research-based spin-offs in structuring and opening innovation ecosystems. *International Journal of Innovation and Technology Management*.
- Dos-Santos, M.J.P.L. (2022). 2 articles in indexed journals
- Espadinha-Cruz P., Godina R., Matos F., Neves, A. (2022) Development of a Maturity Model Of Additive Manufacturing: A Conceptual Model Proposal. *Sustainability*, MDPI.

## 4.2. CITIES AND TERRITORIES (CT)

This RG focuses its research on the territorial dimensions of contemporary socioeconomic, environmental and cultural change, analysing its complex restructuring mechanisms in light of their spatiality, their territorial embeddedness and their spatial-morphological dimensions, framing them in the scope of the action towards the promotion of multidimensional sustainable development processes.

The deep restructurings, which affected the organization of socioeconomic and physical systems since the 1970s, and their technological and socio-cultural drivers, raising the centrality of informational, cognitive and symbolic contents to these processes, brought new challenges to the way we conceptualize, empirically analyse, plan and develop public policies for urban and rural territories. The complexity of movements and rationalities behind centripetal and centrifugal dynamics, which affect urban systems, and the organization of metropolitan spaces today also raise new questionings and challenges to the ways cities are shaped and planned and how academics can propose ways to understand and act in increasingly complex systems and develop tools to promote their resilience. This research group invests in the disentangling of these processes, through a variety of themes (e.g., the urban form, creative dynamics, ways of inhabiting, recomposition processes, urban representations, among others) and empirical contexts (from the in-depth analysis of Portuguese metropolitan areas and cities, to comparative analysis with European or Lusophone cities, for example), favouring an interdisciplinary perspective which is nurtured by this research group's diversity.

The Cities and Territories RG's strategy for deepening knowledge about the dynamics of change in these spatial and territorial terms is based on the acknowledgment of the diversity of logics, processes and actors that produce and appropriate these processes. This is always done from a triple perspective, involving (i) the analysis of the "dynamics" themselves; (ii) the understanding of the regulation and planning issues and the aspects related to urban/territorial action and "policy-making"; and (iii), a "reflexive" consciousness of the way these spaces are worked and how they are studied.

This encompasses a permanent concern with the deployment of new planning methodologies and ideas in urban and social policy design, often based on research-action processes, and fostering the creation of useful knowledge to facilitate agents' action and policy-making, concerning urban planning and regional/local development strategies in Portugal and elsewhere, and providing public officials and community leaders with new tools for management and policy analysis.

The research group is also committed to the development of new methodologies to disseminate research results to society and to consolidate bridges between academia, policy makers and civil society.

## Thematic Lines

### **1. Creativity, culture and territory (*Criatividade, Atividades Culturais e Território*) (Coord: Pedro Costa)**

This Thematic Line carries out fundamental and applied research on the role of the arts and culture in fostering development, the competitiveness of territories and urban revitalization from both a historic and contemporary perspective. It seeks to understand the territoriality of these activities and creative dynamics, getting a perception of their organization and spatiality and, on the other hand, it strives to shed light on their multiple contributions to various aspects of sustainable development and the resilience of the territories.

The six research programmes within this TL are:

- A. Urban artistic interventions;
- B. Culture, knowledge, competitiveness and territorial development;
- C. Cultural districts and creative dynamics: new methodologies of analysis;
- D. Structuring cultural activities, pathways and publics;
- E. Creative tourism;
- F. Art, heritage and territories.

The main scientific objectives of this Thematic Line are:

- i) To develop conceptual and empirical work on the role of cultural activities in the promotion of territorial development and inform territorially-based cultural planning;
- ii) To develop conceptual and empirical work in order to understand the role of urban milieus in the development of creativity and cultural activities;
- iii) To develop conceptual and empirical work in the assessment of the multidimensional impacts and effects of cultural activities in terms of sustainable development processes.
- iv) To disentangle the socio-economic functioning of cultural activities, creation processes, audiences, and their relation with the territory (in specific empirical cases: e.g. performing arts, architecture, alternative music; photo festivals);

- v) To study and put into practice and test urban interventions and art in public spaces;
- vi) To study, conceptually and empirically, and to help the development of creative tourism practices, particularly in low-density areas;
- vii) To further explore the relation between art, heritage, architecture, history and territories;
- viii) To develop the exploration of new methodologies and concepts for artistic urban interventions and to enhance participation-research methodologies.

Goals of this Thematic Line for 2022 include the continuation of work on collective ongoing research projects (Stronger Peripheries, Artemrede) as well as dissemination of results of other projects (ICA, Oeiras, CREATOUR) and the submission of new project proposals to different competitive calls (H2020, Creative Europe, FCT), as well as the continuation of individual projects (Post-Doc and PhD) under this thematic line. DC-Iscte will co-organize the international conference HINTS - Heritage Inclusive Tourism Symposium, in Lamego and, such as in recent years, will be partner in the organization of KISMIF conference, in Porto. Other events will occur throughout the year (e.g VIII Ciclo de Conferência(s) da(s) Arte(s): contaminações, VIII Laboratório Colaborativo Dinâmicas Urbanas, Património, Artes. Seminário de Investigação, Ensino e Difusão). Expected outputs include several international presentations in scientific events, working papers, book chapters, papers in scientific peer-reviewed journals, as well as the aforementioned submission of new projects. Exhibitions, urban interventions and audio-visual outputs are also expected results of the diverse projects.

## **2. Representations and discourse on architecture and territory (*Representação e discurso na arquitectura e no território*) (Coord: Paulo Tormenta Pinto)**

This Thematic Line conducts research focused on discourse and representation in the practice and theory of architecture, primarily on questions related to the copyright and contextual interpretation of architectural work, taking a perspective that crosses the contemporary with the history of architecture and urbanism. This multiple interpretation of the various forms of representation and discourse is understood to be as important as the research line on the change of the territory and contemporary society.

The four research programmes within this line are:

- A. Representation of contemporary space;
- B. Architecture, landscape and territory;

- C. Architecture and Portuguese architects: portraits and dynamics;
- D. Architectural practice and teaching.

The main scientific objectives of this Thematic Line are:

- i) Analysis of the territorial representation on architectural thought and on the discourse(s) of architecture;
- ii) Study of the authorial dimension of spatial development projects and their urban insertion;
- iii) Analysis of the representations of architecture in other fields (literature, cinema, etc.);
- iv) Study of architects' biographies and architecture schools, particularly in Portugal;
- v) Analysis of the meanings of authorial and popular architectures;
- vi) Reflexive analysis of the profession and of the pedagogical practices in architecture.

Goals for 2022 concerning the “Representations and discourse on architecture and territory” Thematic Line include the following-up of seminars fostering debate and critical assessment of PhD theses and the joint organization (with ISTAR-Iscte) of the annual colloquium in the framework of the PhD programme. Besides the activity held in the scope of the ERC-REArq.IB - Built Environment Knowledge for Resilient, Sustainable Communities: Understanding Everyday Modern Architecture and Urban Design in the Iberian Peninsula (1939-1985) team project, the conclusion and dissemination of results of FCT funded projects “The Grand Projects - Architectural and Urbanistic Operations after the 1998 Lisbon World Exposition” and F-Atlas Paisagens franciscanas: a observância entre Itália, Portugal e Espanha are expected, as well as the development of the 2 FCT projects on Siza Vieira. A multiplicity of individual research projects (particularly in the framework of Architecture of Contemporary Metropolitan Territories), but also at Post-doctoral level, are also central to this thematic line, and new research proposals submitted to competitive calls are expected as well.

### **3. Ways of Living, Society and Architectural Culture (*Modos de Habitar, Sociedade e Cultura Arquitectónica*) (Coord: Ana Vaz Milheiro)**

This Thematic Line develops several sub-lines of research on the issues of architectural culture and history, housing and ways of living. The analysis carried out deals with the architectural production and the sociological presuppositions of architecture, considering the private and public initiatives, understanding local specificities, national and international realms.

Five research programmes are defined in the scope of this Thematic Line.

- A. Architectural culture, in contemporary and historical scopes;
- B. Housing, habitat and ways of living;
- C. Residential behaviour, social and housing re-composition in the metropolis;
- D. Post-colonial perspectives on Portuguese-speaking countries' urban growth;
- E. Rehabilitation, regeneration and urban revitalization.

The main scientific objectives of the Thematic Line are:

- i) Analysis of the private housing market dynamics, residential trajectories and their relationship with the social recomposition of territories and ways of inhabiting;
- ii) Support to the formulation, implementation and evaluation of public policies, including rehabilitation and urban regeneration;
- iii) Analysis of the morphologic dimension of housing projects and their urban insertion;
- iv) Study of the urban development processes in colonial and post-colonial contexts (with particular focus on Portuguese-speaking African countries, Macao and Brazil)

In 2022, researchers involved in the “Ways of Living: Society and Architectural Culture” thematic line will carry out a diversity of activities related to all its five research programmes by participating in conferences (presenting papers, attending as keynote speakers, etc.), publishing articles, organizing books, setting up exhibitions, organizing seminars, workshops, etc. Besides the collective projects underway (MCMH and ARCHWAR funded by FCT, and several activities under the COST Action CA18137 “European Middle-Class Mass Housing”), several ongoing PhD theses are being developed under this TL both at Iscte and other institutions. A new project, in collaboration with ICS, will start in 2022: UrbanoScenes. Post-colonial imaginaries of urbanisation: A future-oriented investigation from Portugal and Angola.

#### **4. Recompositions, metropolitan change and housing (*Recomposições, mudança metropolitana e habitação*) (Coord: Teresa Costa Pinto, M<sup>a</sup> Assunção Gato and Sandra Marques Pereira)**

This Thematic Line focuses on the understanding of contemporary housing systems, socioeconomic recompositions and metropolitan dynamics of change, considering the multiple impacts, interests, conflicts and associated values.

Five research programmes in the scope of this TL are:

- A. Structural social and economic recompositions in the Lisbon Metropolitan Area;
- B. Metropolization dynamics (peri-urban and suburban territories, small and medium-sized cities);
- C. Global processes of urban change (e.g. gentrification, touristification, financialization/commodification);
- D. City consumptions, lifestyles and quality of life;
- E. Housing, residential practices, markets and politics.

The main scientific objectives of this Thematic Line are:

- i) To understand the dynamics of recomposition and change in the Lisbon Metropolitan Area and to assess the several impacts resulting from these changes, while developing comparative analyses with other territories;
- ii) To understand the metropolitan transformation dynamics, with particular focus on suburban and peri-urban areas and on restructuring areas, not neglecting small and medium-sized cities;
- iii) To conceptualize and empirically inform the relations between territorial change and globalized processes of economic, social, and cultural transformation, focusing on the effects produced in cities and their populations;
- iv) To analyse socioeconomic and territorial recompositions in light with consumption practices, lifestyles and quality of life;
- v) To understand and analyse the contemporary housing and residential practices, in line with market transformations and public policies.

The team members continue to work on the topics targeting housing, recompositions and territorial change analysis in different perspectives, also taking into account the latest pandemic issues and their impacts. The current changes in Lisbon's housing and the awareness of their high speed require a

new approach in terms of monitoring - the need to capture them in (almost) real time. For this purpose, members of this TL developed the LxHabidata, which is an open-source platform of georeferenced data on housing including different indicators. It has 4 main targets: citizens/civil society; public stakeholders; academics; real estate agents. The platform is already available online and will be continuously updated and fed by the inclusion of new variables. In addition to its innovative feature, this data platform also fills a void in the academic and the wider urban context of Lisbon. One of the goals for 2022 is to develop an Observatory on housing as a way to consolidate the analysis component of the produced data and to develop more research synergies with several public entities.

In 2022 the annual conference of the European Network for Housing Research in Barcelona will be held, with the participation of the Southern European Housing Working Group, which includes members of this TL.

Several individual research projects are underway and new research proposals will be submitted to competitive calls (FCT, La Caixa Foundation) and meeting policy challenges and other initiatives by public entities. The funded project SIZA\_3City (FCT) will start in 2022 requiring a considerable investment of time and work by the members of this LT. The publication of book chapters and articles in national and international journals is expected, given the different stages in which some already are in terms of the publication process.

## **5. Territorial governance, spatial planning and socio-spatial intervention (*Governança territorial, ordenamento do território e intervenção socio-espacial*) (Coord: Maria Fátima Ferreiro)**

The aim of this Thematic Line is to analyze (and whenever possible to participate in and/or evaluate) the formal and informal public intervention processes of spatial planning, strategic planning, master or specific plans, and to glean further knowledge on the rationale of socio-territorial interventions that result from either public initiative (or financing) or citizens' movements in response to concrete problems. It also strives to tackle questions of regional and local development in light of the endogenous and exogenous dynamics of the territories, examining the respective development strategies in terms of the negotiation of interests of the different (public and private) agents involved and the resulting rationale of regulations and governance.

Seven research programmes are defined in the scope of this Line for the period:

- A. Planning instruments and spatial planning;
- B. Socio-spatial intervention, social inclusion and community development;
- C. Territorial development and regional and local development policies;

- D. Planning and enhancing facilities and public spaces;
- E. Territorial management and metropolitan governance;
- F. Participation, associativism and citizenship;
- G. Innovative milieus, networks and territorial development.

The main scientific objectives of this Thematic Line are:

- i) To analyze the relationship between development, territorial cohesion and regional and local planning and policies;
- ii) To assess and help monitor public policies, namely at local/regional level, developing public advising in the diverse fields related to urban planning and territorial development;
- iii) To help the design of public policies related with spatial planning and strategic planning of territories and cities;
- iv) To discuss governance issues and contribute to the theoretical development of the analysis on governance, public policies and planning methodologies;
- v) To understand the role of community-rooted development mechanisms, participation and urban social movements;
- vi) To promote the deepening of the analysis of the governance processes of territorial systems and planning strategies.

The aim of this Thematic Line is to contribute to action in spatial planning processes and to develop knowledge on socio-territorial interventions that result from either public initiative (or funding) or citizens' movements in response to concrete problems. It also strives to tackle questions of territorial development examining agents strategies concerning potential regulation and governance. The contemporaneous challenges concerning agency, social innovation and transdisciplinary research for capacity building in territorial development and resilience are also included in the scope of this Thematic Line's research concerns. A diversity of new projects will tackle these issues, under different perspectives, in 2022 (including Care (4) Housing - A care through design approach to address housing precarity.; Monitorização e Avaliação de Impactos Territoriais das políticas públicas através de uma plataforma: Impact-WEB-SIG.; Proposta de Metodologia de Avaliação de Impacto da Bolsa Nacional de Alojamento Urgente e Temporário do Plano de Recuperação e Resiliência; or Impactos territoriais do COVID. The reinforcement of synergy and scientific co-operation within this Thematic Line is expected throughout 2022. Projected outputs include working papers, book chapters, papers in scientific peer-reviewed journals and submission of project proposals. The organization of international conferences and seminars and the collaboration in the organization in international conferences leading to

international publications are also important streamlines under this thematic line.

## **6. Urban Morphology and Sustainability (*Morfologia Urbana e Sustentabilidade*) (Coord: Teresa Marat-Mendes)**

This Thematic Line focuses on the analysis of urban morphology and the operational rationale and structuring of territorial planning and urban metabolism, through the lens of sustainability. Specifically, it focusses on the social and ecological dimensions of the urban metabolic performance, while relating to the built environment. Given the interdisciplinary vocation of the urban metabolism term, this should be used as a concept that bridges perspectives and insights across different disciplines with a common interest: the study of the social and environmental performance of the territory and cities. Both urban and rural realities are assumed as a strategic dynamic and transversal factor for the development of the territories of the future.

Four research programmes are defined in the scope of this Thematic Line for the current period:

- A. Urban morphology and urban planning;
- B. Urban metabolism, environment and sustainability;
- C. Technologies and modernization of the Habitat;
- D. Food Systems, short circuits, food quality and security.

The main scientific objectives of this Thematic Line are:

- i) to understand the evolution of the urban metabolism and its relationship to society sustainability challenges;
- ii) to disclose land uses managements and land property in rural and urban areas;
- iii) to promote interdisciplinary methodological approaches concerning the description and prescription of urban form;
- iv) to help the management of environmental risks and natural resources;
- v) to explore technological issues and natural resources use efficiency;
- vi) to enhance the knowledge and policy advisory tools concerning urban planning and food systems. Specifically, with impact on food security, food quality, access to food, and their relationship with other sectoral development policies, as the rural ones.

The main activities that are expected to take place in 2022 are still related to the conclusion of the SPLACH project and the preparation of new research proposals and seminars on the sustainability thematic, as well as the development of several non-funded or individual projects that are ongoing under this TL. Several publications are being prepared, as well as the presentation of seminars. Several post-doc and young researchers are being mobilized and show interest in this thematic line, which will contribute to reinforce the number of activities and publications. Current PhD works are being developed within this Thematic Line, related to issues of urban planning, urban sustainability, foodscape morphologies and sustainability, changes in living and urban form. The discussion is also expected to expand and increase contributions of this TL among DC-Iscte researchers.

## CT Expected Achievements for 2022

### New projects to start:

- Care (4) Housing - A care through design approach to address housing precarity. Proponent: Iscte, PI: Joana Lages. Funded by FCT; ISCTE budget: €236.109,72 (248.026,79€). (TL4/TL5)
- Monitorização e Avaliação de Impactos Territoriais das políticas públicas através de uma plataforma: Impact-WEB-SIG. Proponent: Iscte; PI: Eduardo Medeiros. Funding Source: Portugal 2020. ISCTE budget: €139.993,91. (TL5)
- Proposta de Metodologia de Avaliação de Impacto da Bolsa Nacional de Alojamento Urgente e Temporário do Plano de Recuperação e Resiliência. Proponent: Iscte; PI: Sérgio Caramelo. Funding Source: Portugal 2020. ISCTE budget: €139.723,93. (TL5)
- UrbanoScenes. Post-colonial imaginaries of urbanisation: A future-oriented investigation from Portugal and Angola. Proponent: ICS; PI: Simone Tulumello. DC team: Andrea Pavoni. Funded by FCT. ISCTE budget: €70.158,80, application result: funded (249.892,09€) (TL3)
- SIZA\_3CITY – Alvaro Siza's collective housing: projects, contexts, and experiences (Porto-Lisbon-New York). Proponent: Iscte, PI: Sandra Marques Pereira. Funded by FCT; ISCTE budget: €86.680,60 (119.998,70€). (TL2)
- RE-DWELL - Oferta de habitação sustentável e acessível na Europa. Proponent: FUNITEC, DC-ISCTE Coordinator: Alexandra Paio. Funded by EC. ISCTE budget: €475440,48
- Bairros Saudáveis 2020: 687. Laboratório de Inovação Comunitária – LIC. DC-ISCTE Coordinator: Alexandra Paio. Funded by BIP ZIP programme.

### Collective Projects (ongoing)

- ArchWar - Controle e violência através da habitação e da arquitectura, durante as guerras coloniais. O caso português (Guiné-Bissau, Angola e Moçambique): documentação colonial e análise crítica pós-independência (Coord. DC-Iscte: A. V. Milheiro). (TL3)
- Coordination of the EU COST Action: CA18137 “European Middle Class Mass Housing” (Coord: A. V. Milheiro; team DC-Iscte: A. V. Milheiro, I. L. Rodrigues, M. Pacheco, A. Areia, F. Fiúza, J. Cardim, P. Canelas, R. Almeida, S. M. Pereira) (TL3);

- ERC-REArq.IB - Built Environment Knowledge for Resilient, Sustainable Communities: Understanding Everyday Modern Architecture and Urban Design in the Iberian Peninsula (1939-1985) (Coord. DC-Iscte R. Agarez);
- LxHabidata - Plataforma de dados de habitação sobre Lisboa, funded by project: “Transições urbanas observar e agir” and individual researchers funds (from 2020 funded also by DC-Iscte Programmatic Project, LxHabidata) (Coord: S. M. Pereira, T. C. Pinto, M. Matos, M. A. Gato) (TL4);
- Criatividade e mudança social - laboratório de ética societal e acção social (Coord. DC-Iscte: Dulce Moura) (TL4);
- MCMH - Middle Class Mass Housing in Europe, Africa and Asia (Coord: A. V. Milheiro) (team DC-Iscte: I. L. Rodrigues, S. M. Pereira, F. Fiúza, B. M. Ferreira, J. C. Ribeiro) (TL3);
- SIZA - A monumentalidade crítica de Álvaro Siza (Coord. DC-Iscte: P.T. Pinto) (TL2);
- The Grand Projects - Architectural and Urbanistic Operations after the 1998 Lisbon World Exposition (Coord: P. T. Pinto) (team DC-Iscte: P. Costa, J. P. Delgado, V. M. Ferreira, A. V. Milheiro, J. L. Saldanha, P. da Luz Pinto, S. M. Pereira, V. Mingacho, A. Belo, A. Brandão, I. Cayolla, J. M. Costa) (TL2);
- STRONGER - Stronger Peripheries: A Southern Coalition | Sp (Coord. ARTEMREDE; Coord DC: P Costa; team DC-Iscte: P. Costa, M. Perestrelo, Ricardo V. Lopes, E. Tomaz). (TL1)
- Impactos AR (ARTEMREDE-Retorno: Estudo de Impactos Fase 1: Estudo “piloto” de análise do retorno de investimento), funded by ARTEMREDE, Teatros Associados, (Coord. D’C-Iscte P. Costa, team: P. Costa, E. Tomaz) (TL1);
- Envelhecimento Cascais - Estudo, estratégia e plano sobre envelhecimento – velhice e políticas sociais no concelho de Cascais Estudo, Estratégia e Plano sobre o Envelhecimento – Velhice e Políticas Sociais no concelho de Cascais, funded by Câmara Municipal de Cascais, (Coord: G. Sugahara) (TL5);
- F-ATLAS - Paisagens franciscanas: a observância entre Itália, Portugal e Espanha (Coord. UNIFI; Coord DC: R. Volzone / S. Genin; team DC-Iscte: R. Volzone, A. Paio, S. Genin); (TL2);
- Impactes territoriais da Covid-19 e respostas políticas nas regiões e cidades europeias – Portugal (Coord. EM Normandie Business School; Coord DC: E. Medeiros.; DC-Iscte team: E. Medeiros) (TL5).

### **Non-Funded on-going projects:**

- NUTRIMOVERE – Bairros Saudáveis (Coord. DC-Iscte. M.R. Sousa).
- RIZOMA – Bairros Saudáveis (Coord. Cooperativa Rizoma, DC-Team: João Fialho).
- Togetherness (DC contribution to the New European Bauhaus initiative), with two distinct axes (MAPPING CO-DESIGN and ENVISIONING (UN)CERTAIN FUTURES) (Coord. DC-Iscte: J. P. Lages).

### **Collaboration in projects coordinated by other institutions:**

- Cost Action 18214 - The Geography of New Working Spaces and the Impact on the Periphery (Coord. Politécnico di Milano; Team DC-Iscte: E. Tomaz, M.A. Gato).

### **Project proposals submitted for funding awaiting results**

- ABC Collaborative Laboratory: Integrated Aging and Rejuvenation Solutions. Proponent: Associação para o Desenvolvimento do Centro Académico de Investigação e Formação Biomédica do Algarve; PI: Clévio Nóbrega. DC team: Sara Ramos, Ana Brochado, Gustavo Sugahara. Submitted to FCT.
- Peripatein 3.0. Proponent: University of Public Services (UPS)-Hungary; DC team: Eduardo Medeiros. Submitted to European Commission.
- Women architects in former Portuguese colonial Africa: gender and struggle for professional recognition (1953-1985). Proponent: ISCTE; PI: Ana Vaz Milheiro; Co-PI: Leonor Matos Silva. Submitted to FCT.
- Watering Africa: a post-colonial critical approach to the 20th century development plans of the Cunene and Limpopo rivers. Proponent: ISCTE; PI: José Luís Saldanha; Co-PI: Rogério Vieira de Almeida. Submitted to FCT.
- EUROCITIES - Planeamento urbano transfronteiriço através de Cidades Fronteiriças para um desenvolvimento mais integrado, sustentável, inclusivo e inovador. Proponent: ISCTE; PI: Eduardo Medeiros; Co-PI: Paulo Neto. Submitted to FCT.
- METSCAPES - Metabolic Transitions of Lisbon Region Planning 1930-2030. Proponent: ISCTE; PI: Teresa Marat-Mendes; Co-PI: Patrícia Bento d'Almeida. Submitted to FCT.
- Convent(us) - Paisagens pós-conventuais: reutilização do património, sustentabilidade e resiliência rural. Proponent: ISCTE; PI: Rolando Volzone; Co-PI: Aurora Carapinha. Submitted to FCT.

- BLisT -Building Lisbon's Tourism Future: Learning from European Cases of Overtourism, Tourism-Driven Displacement and Housing Transformation for a more Resilient, Sustainable, and Inclusive Planning. Proponent: ISCTE; PI: Maria Assunção Gato; Co-PI: Ana Rita Cruz. Submitted to FCT.
- Reshaping ways of working in Portuguese creative economy: the impacts of Covid-19 and accelerated digitalization on cultural work. Proponent: ICS; DC team: Pedro Costa, Elisabete Tomaz. Submitted to FCT.
- Lis|PIH - LISBON PRE-INDUSTRIAL HOUSING (16th-early19th c.). Planning strategies and design measures to foster a sustainable urban regeneration. Proponent: IST; DC team: Sandra Marques Pereira. Submitted to FCT.
- HTransY - Housing access among young people in the Lisbon Metropolitan Area. Proponent: ISCTE; PI: Maria Assunção Gato. Submitted to La Caixa Foundation.
- Convent(us) - Estratégias de desenvolvimento sustentável dos territórios rurais do Alentejo através do património conventual subutilizado. Proponent: ISCTE; PI: Rolando Volzone; Co-PI: Aurora Carapinha. Submitted to "la Caixa".
- Neglected Religious Heritage. Investigating sustainable reuse towards stronger rural resilience. Proponent: Rolando Volzone. Submitted to FCT (Concurso Estímulo ao Emprego Científico Individual - 5ª edição).

### **CT grant positions opening in 2022**

- 3 research grant (BA)| Project: POAT, January 2022;
- 1 research grant (MA)| Project: A Monumentalidade Crítica de Álvaro Siza, January 2022;
- 1 research grant (MA)| Project: "UrbanoScenes", January 2022;
- 1 research grant (BA)| Project: BRIGHET - Aproximar o Ensino Superior, a Formação e a Qualidade do Emprego, February 2022;
- 1 research grant (MA)| Project: A Monumentalidade Crítica de Álvaro Siza, March 2022;
- 1 research grant (MA)| Project: ArchNeed – The Architecture of Need: Community Facilities in Portugal 1945-1985, April 2022.
- 1 research grant (MA)| Project: SIZA\_3CITY - Habitação colectiva de Álvaro Siza: projetos, contextos e vivências (Porto-Lisboa-Nova Iorque), May 2022.

### **Research contracts (under individual and institutional "Scientific Employment")**

1. Alexandra Saraiva;

2. Ana Rita Cruz;
3. Andrea Pavoni;
4. Joana Pestana Lages;
5. Maria Assunção Gato;
6. Nuno Grancho;
7. Sandra Marques Pereira.

### **Funded Post-Doc projects (ongoing)**

1. Ana Luísa da Silva Fernandes: Espaços Comuns. Entre as obras públicas e a habitação autoproduzida: mobilização colectiva para a qualificação urbana em Moçambique (TL2.3);
2. Inês Lima Rodrigues: I Triologia Moderno Monográfica: Vieira da Costa, Simões de Carvalho, Castro Rodrigues (TL2.3);
3. Patrícia Beirão da Veiga Bento d´Almeida Machado Lima: O LNEC e a História da Investigação em Arquitectura (TL2.6).

### **Ongoing PhD theses in 2022:**

#### ***Funded PhD Projects (ongoing)***

1. Carolina Henriques, Transdisciplinaridade em Estudos Urbanos: lógicas de produção de conhecimento e paradigmas emergentes, Supervisor: Teresa Costa Pinto
2. Catarina Mateus, Qual o papel do terceiro sector na reestruturação socio-espacial das zonas rurais (Europa e América Latina)?, Supervisor: Maria de Fátima Ferreira
3. Eduardo Corales Aguilera, POWERPOINT – Arquitetura hidroelétrica em Portugal e o território como projeto, Supervisor: José Luís Possolo Saldanha
4. Filipe Nassauer Mónica, Selecção Natural – A cultura do Concurso de Arquitectura em Portugal (1993-2013), Supervisor: Ana Vaz Milheiro
5. Geraldo Pina, 100 anos de Bissau: Tensões, Frustrações e Expectativas, Supervisor, Ana Vaz Milheiro
6. Hugo Reis, The impacts of cultural events on urban transformation: temporary art and architecture in public space. Supervisor: Pedro Costa / Ana Brandão, Iscte; Laura Castro (CT)

7. Irina Gomes, Planeamento Territorial versus Realidade Construída em Portugal: uma leitura para a acção futura, Supervisor: Teresa Marat-Mendes.
8. Isabella Rusconi, Participação e institucionalização: metodologias e inovações democráticas na produção de cidades. Supervisor: Alexandra Paio, Iscte.
9. João Cardim Ribeiro, Da Célula à Cidade: Composição Modular e Planeamento Urbano na Obra de Justino Morais 1960-1990, Supervisors: Paulo Tormenta Pinto/Ana Vaz Milheiro.
10. João Concha, Da Revitalização Urbana na Lisboa pós-Expo'98: os Festivais de Arte no Espaço Público, Supervisor: Pedro Costa.
11. João Cunha Borges, «The Dissolution of the Modern Complex» on the work of Aldo Van Eyck and Alison & Peter Smithson. Supervisor: Teresa Marat-Mendes (D'C) e Ivor Samuel (Univ. Birmingham).
12. Krisztina Ramneantu, EUBioLisboa - Estruturas urbanas biofílicas: Uma aplicação em Lisboa, Supervisor: Teresa Marat-Mendes.
13. Laura Sobral, Mobility of urban public policies of co-production and co-governance: a study of the circulation of knowledge in the BIP/ZIP case, Supervisor: Alexandra Paio
14. Mariana Grácio Nunes Sanchez Salvador, A Paisagem alimentar de Lisboa: evolução da morfologia urbana nos séculos XIX e XX, Supervisor: Teresa Marat-Mendes (DC) e Rosário Nunes (ICS).
15. Maria Raquel Sousa, Agricultura no Concelho de Lisboa: denominadores comuns e diversidade: uma abordagem socio-ecológica no planeamento urbano, Supervisor: Paulo Tormenta Pinto.
16. Pedro Namorado Borges, Reinvenções da Arquitetura Popular: Aldeias Melhoradas em Portugal (1958-1974). Supervisor: Ricardo Agarez, Universidade de Évora.
17. Rui del Pino Fernandes. Virtus in medium est - História e Planeamento para um futuro Urbano-Rural. Supervisor: Teresa Marat-Mendes.
18. Rui Mendes, Modernidade dilatada no espaço e no tempo - O desenho do projecto de Sines 1971-2016.
19. Sara Silva Lopes. Habitação em Democracia: Perspectiva tipomorfológica e sócio-espacial das políticas de habitação no território metropolitano de Lisboa. Supervisor: Teresa Marat-Mendes.

20. Sebastiano Raimondo. "Lugares" na fotografia contemporânea - Relação entre Portugal e Itália nas décadas de 80 e 90, Supervisor: Paulo Tormenta Pinto
21. Sebastião Santos, Wild Brave Future – planning for resilience in moments of uncertainty: Lisbon Metropolitan Landscapes under extreme scenario, Maria de Fátima Ferreira
22. Sonja Dragovic, Reshaping Urban Governance from Below: The Influence of Socially Engaged Architectural Practices on Urban Development Policies in the European Periphery – Comparing Portuguese and Croatian Experience, Supervisor: Alexandra Paio (CT).
23. Susana Teresa de Azevedo Nogueira, Arquitectura, a sua influência no conforto e qualidade de vida em residências para idosos, Supervisor: Vasco Rato

#### ***Non-funded PhD Projects (ongoing)***

1. Alexandra Belo, A concretização das cidades invisíveis. Reabilitações nos centros históricos das cidades de média dimensão: o caso de Castelo Branco (anos 2000-2013), Supervisor: Pedro Miguel Alves Felício Seco da Costa, Iscte(CT)
2. Ana Carolina Carvalho Farias, Observatório BIP/ZIP: Mediações digitais para o desenvolvimento local em Lisboa, Supervisor: Alexandra Cláudia Rebelo Paio, Iscte(CT)
3. Ana Carolina Salvador Taveira Cardoso, Cidade como laboratório vivo de inovação: comunidade e democratização das tecnologias, Supervisor: Alexandra Cláudia Rebelo Paio, Iscte (CT)
4. Ana Catarina Graça, Augi: (Re) Habitar Para (Re) Integrar, Supervisor: Alexandra Cláudia Rebelo Paio, Iscte (CT)
5. Ana Cravinho, Espaço público: as dinâmicas do conflito. Supervisor: Teresa Madeira da Silva, Iscte (CT).
6. Ana Cristina de Menezes Santoro, Strategies for damage mitigation and preventive conservation of ethnographic objects in ceramics, from the analysis of the production of the Karajá people (Iny), inhabitant of the central region of Brazil, Co-supervisor: Maria Assunção Gato, UCP (CT)
7. Ana Lourenço Pinto, Entre o Tradicional e o Moderno: a Arte Neobarroca Portuguesa, do Romantismo ao Estado Novo (1889-1962). Co-supervisor: Ricardo Agarez, Universidade de Lisboa (CT)

8. Anabela Lucília Rodrigues da Silva Alves, Avaliação do Programa “Bolsas de Estudo” do Fundo de Desenvolvimento do Capital Humano de Timor-Leste (2011-2021). Supervisor: Sérgio Caramelo, Iscte (CT)
9. António Brito Guterres, A importância do commons enquanto elemento fulcral para a promoção da qualidade de vida e desenvolvimento na AML, Supervisor: Pedro Miguel Alves Felício Seco da Costa, Iscte (CT)
10. Barraí Hennebry, Social innovation and regional development, Co-supervisor: Maria de Fátima Palmeiro Batista Ferreira, Universidade de Poznan. (CT)
11. Beatriz Serrazina, Reflexos Contemporâneos do empreendimento da Diamang na região da Lunda na infraestruturização do território angolano – conexões transnacionais, culturas e práticas de colonização (1917-2016), Co- Supervisor: Ana Vaz Milheiro, CES. (CT)
12. Bruno Macedo Ferreira, Optimist Suburbia: uma visão para a Cidade Contemporânea. Leitura crítica sobre a configuração urbano-arquitetónica da periferia norte da cidade de Lisboa, Co-Supervisor: Ana Cristina Fernandes Vaz Milheiro, Iscte (CT)
13. Carla Sofia Lopes Duarte, Pelos passos do Flâneur, Reaprender a Caminhar na Cidade do Séc. XXI. Entre as Portas de Santo Antão e São Sebastião da Pedreira, Supervisor: Paula Cristina André dos Ramos Pinto, Iscte (CT)

59. Verónica Neves, O Crime e o Contexto, Supervisor: Teresa Costa Pinto, Iscte (CT)
60. Yi Lianrong, The Roles of Culture and Creativity on Economic Development in Village-based Communities in China in 1980-2016: The Study of Two Cases, Supervisor: Ana Rita Pereira Marques da Cruz, ISCTE. Co-Supervisor: Pedro Miguel Alves Felício Seco da Costa, Iscte (CT)

### Organization and participation in scientific events (planned)

Local	Name	type	Researcher
Iscte	Workshop Dinâmicas	Internal workshop	All DC
Zoom	Compromissos com o Meio Ambiente. 50 anos da Conferência de Estocolmo (1972-	Seminar cycle	Paula André
zoom	VIII Ciclo de Conferência(s) da(s) Arte(s): contaminações	Conference	Paula André
Mértola	VIII Laboratório Colaborativo Dinâmicas Urbanas, Património, Artes. Seminário de Investigação, Ensino e Difusão	Meeting	Paula André

Lisbon	CREATOUR: Catalisando o turismo criativo em cidades de pequena dimensão e em áreas rurais	Book launch	Maria Assunção Gato
Iscte	Entre Factos e Políticas(os): discutindo o relançamento do turismo urbano pós-pandemia	Seminar	Maria Assunção Gato
Évora	VIII Congresso APA, Associação Portuguesa de Antropologia	Thematic panel	Maria Assunção Gato
NA	Seminário inaugural do projecto 'Care(4)Housing'	Seminar	Joana Lages
Online	Social Design - 3 online events + workshop	workshop	Joana Lages
NA	1ª Edição das Oficinas de Investigação em Estudos Urbanos	workshop	Maria Amélia Cabrita
Brazil	PNUM	Conference	Inês Isidoro
Berlim	Midterm Conference - Research Network 37: Urban Sociology: "Seeing Like a City/Seeing the City Through"	Conference	Madalena Côrte-Real
Lamego	HINTS - Heritage Inclusive Tourism Symposium	Conference	Maria de Fátima Ferreira
Lisbon	III Ciclo de Palestras: Investigar Arquitetura no LNEC	Public lectures	Patrícia Bento d'Almeida
Belgrade	MCMH meeting	Meeting	Inês Lima Rodrigues
Angola	Arquitetura Moderna em Angola	Conference cycle	Inês Lima Rodrigues
Greece	WG1 MCMH Workshop	Workshop	Inês Lima Rodrigues
Galeria de Arquitectura	Habitar, Delimitar, Sentir	Exhibition + talks	Andrea Pavoni
NA	talk in the context of Human Entities 2022,	Talk	Andrea Pavoni

Lisbon and Oporto	A Produção do Mundo. Problemas Logísticos e Sítios Críticos (Cooperativa Outro Modo)	Book launches	Andrea Pavoni
NA	Movimento de Expressão Fotográfica (MEF) designado "Memória do Agora - As Antigas Estradas de Lisboa"	Exhibition	Carla Duarte
NA	Entre o Mar e a Terra	Conference + Exhibition	Gabriela Gonçalves
Lisbon	Stronger Peripheries	International Conference	Pedro Costa
NA	Chelas nha Kau	Book launch	Ricardo Lopes
Maputo	Laboratório de Espaços Comuns	Workshop	Ana Silva Fernandes
NA	Conferência Arquitetura Arte Nova em Portugal	Conference	Pedro Ferreira da Silva
NA	Projeto ArchWar	Exhibition	Sónia Henrique and Francesca Vita
Azores	Creative Tourism, Regenerative Development, and Destination Resilience	International Conference	Maria Assunção Gato
Casa da Arquitectura de Matosinhos	Flashback / Carrilho da Graça	Exhibition	Marta Sequeira
Iscte	NEB Togetherness	Summer School	Alexandra Paio
NA	KISMIF International Conference 'DIY Cultures, Sustainability and Artistic Ecosystems'	Conference and Summer School	Ana Oliveira

## Planned Publications

### 4.3. GOVERNANCE, ECONOMY AND CITIZENRY (GEC)

This Group centers its research on the modes of regulation and governance, encompassing state's intervention, markets and forms of collective action, in the context of Europeanization and globalization trends. It is assumed that, in addition to the means used by governments to guarantee the rule of law and to promote public policies, new forms of public and private regulation are becoming increasingly relevant, based on co-operation, self-regulation and mobilization of social actors. Both formal modes and processes of regulation, including the legislative procedure, as well as "soft" law-making, and informal modes of social and economic (market) regulation, are studied, with special attention to their impact on the citizens' individual rights and capacity of action, which they can promote or hinder. Among the domains under scrutiny are environmental and public health risks, ICT, financial markets and social policies.

This Group also provides a framework for research on science communication and public engagement, as well as on the role and social responsibility of science and its actors, including researchers and research institutions, all of them increasingly asked to participate in regulatory processes. This is in line with the Centre's strategic objective to promote the self-reflexivity of its researchers in order to better serve society. Economics has been especially concerned by this endeavor, but other scientific disciplines of relevance to the Centre – namely architecture and law – have started similar lines of work.

Taking advantage of inputs from economics, jurisprudence, sociology, political science, architecture, and computer science, this Research Group's thematic lines follow up from this backdrop, sustained by work developed in recent years at the Centre under projects BECOM, Value Isobars, Protect, Risks of S&T in the era of social networks, FESSUD, MORE-PE, OPEN-EC and RECON.

#### THEMATIC LINES

##### **1. Human Rights, Markets and Governance Challenges (*Direitos Humanos, Mercados e Desafios da Governação*) (Coord: Ana Costa)**

Research focusing on the role and impact of the financial system in contemporary societies, specifically on economic performance, income distribution, environmental sustainability, and on regulation of financial systems. Research has also been devoted to the analysis of the crisis narratives which have prevailed during the Portuguese "adjustment programme" both in the design of austerity policies and in their public discussion in the media.

Ongoing research centres on regulatory challenges raised by technological developments with a focus on Digital Technologies. Big data technologies, the Internet of Things and Artificial Intelligence are bringing up new instances of the so-called “law-technology lag”. Research has been devoted to the discussion of the extent to which the reform of the data protection regimes in the EU (entered into force in 2018) is up to the challenges brought about by technological progresses and their implications on the protection of fundamental human rights, namely the right to personal data protection and privacy, and freedoms in general.

The circumstances under which the Action Plan is being written changed enormously since the situation around COVID-19 escalated dramatically. The implications of this whole situation in terms of social conditions, of different modes of provision and their resilience, of the role of the state and of globalization trends are not completely established yet, but they will certainly be at the centre of this Thematic Line research. Nevertheless, the formation of new political coalitions and alternatives call for the mobilization of new discourses and the establishment of new consensuses in terms of institutionalized meanings, a line of inquiry that has been central to our research.

The main scientific objectives of this Thematic Line are:

- A) To participate in the production of knowledge about the impacts of financialization to the Portuguese economy and society;
- B) To critically analyse how European citizens have been exercising their political and social rights in the wake of the economic crisis;
- C) To critically analyse the multidimensional and cumulative economic, social and political impacts of the economic crisis and to assess their permanent feature;
- D) To contribute to the development of a comprehensive approach to the impacts of the COVID-19 crisis integrating, in particular, the following dimensions: a) the disjuncture between located experimented consequences and globalization trends; b) the different sectoral dynamics in response to the crisis in terms of wages, employment, working conditions and inequality; c) the state's intervention and the national and European political answers to the crisis; c) the political alternatives to re-link the economy with society;
- E) To shape concepts for debating the impact of economic discourses, especially in relation to crisis and its relationship to the support of certain economic policies;

- F) To critically analyse how European law and regulation is addressing the risks to human rights arising from digital technologies' applications.

**2. Reflexivity, Communication, and Social Responsibility of Science (Reflexividade, Comunicação e Responsabilidade Social da Ciência) (Coord: Carolina Henriques, Nuno Dias, Patrícia André)**

An output of the activities of this TL should be the development, on the one hand, of training methodologies and scientific practices that understand training itself and research as “democratic experiences” that include forms of integration and communication of innovative knowledge and, on the other hand, of spaces of external communication that can feed more open and broader debates and, in so doing, rescuing the original purpose of Academia.

The presentation and discussion of the paper “Hastening Science: Reflecting on the Scientific Process in Pandemic Times” (June 2021), co-authored by the coordination of the TL team, which proposes an analytical setup on which to base multiple research enquiries, is envisioned as part of the TL work programme. Rather than being restricted to it, these streams of research should proceed anchored on the suggested analytical triangle «science-science/science-politics/science-society» which may enable engaging with the main questions set out in the TL goals.

Following the previous approach to the DC-Iscte internal reflexivity processes, strong emphasis shall be put on dynamics of collective reflection within the Unit, namely concerning the social impact of our work. This enquiry requires fine-grained attention to both the *uses* of scientific knowledge and the *needs* of potential addresses which entails that we should engage in medium-term analysis, both retrospective and prospective, which should be activated enabling not only the production of knowledge about these questions but also the design of substantial evaluative procedures and normative commitments.

Needless to say, that this should not be merely an internal endeavour; it should in fact be grounded on active collaboration with external peers and based on an approach that leads to tackling other main questions, such as the role of social sciences in normative debates, the normative role of knowledge itself, and epistemic pluralism. Having this in mind, it is essential to articulate, from an epistemological perspective, each of the team members' «home» disciplines with the insights of History, Philosophy and Sociology of Science.

Another set of streams of research mentioned above may be labelled as «pandemic crisis and scientific activity and reflexivity». It is indeed inevitable not only to investigate the effects of the pandemic on knowledge production, structures, actors, and institutions, but also to use it as an analytical device to ascertain ruptures and continuities on traditional questions involving science,

politics, and society, such as the role of science in political decision-making, science communication, and the constraints of knowledge production themselves.

One of the main topics under analysis is the renewal of economic thought, underpinned by the study and updating of economic theory and dialogue with other disciplines, namely economic sociology and law. In addition, this TL intends to foster reflection on the relation between strands of economic thought and analysis, and the social responsibility of university research: to what extent does it make sense to talk about the neutrality of economic science?

To participate in the operations of our complex societies requires a high level of knowledge and the capacity to mobilize that knowledge in actual intervention. Scientific research is challenged to contribute to the production of that knowledge under new organizational conditions, always exposed to react to new types of emergencies, as experienced during the COVID-19 outbreak. This may question the usual practices and tools. Among them are the disciplines, as organizationally stabilized differentiations in the domain of science. This is a topic of special interest for DC-Iscte. One of the TLs researchers addresses it directly with a research project on new paradigms of transdisciplinarity.

Additionally, scientific research should also engage:

1. In its own dissemination, through its activities, as well as in co-operation with all kinds of media (scientific communication), and;
2. In the improvement of its mobilization towards actual intervention, in particular taking advantage of experiences, collected in the domain of scientific research itself, of the relationship between the roles of scientist – responsible for the production of accurate knowledge – and of citizen – co-responsible for the proper use of that knowledge (reflexivity and social responsibility).

Under these institutional and general circumstances, the main scientific objectives of this Thematic Line, however, deserve to be maintained. They are:

- A. To participate in the production of knowledge about the scientific world and its relationship to its environment, paying particular attention to the impact on this relationship of the COVID-19 pandemic and the political responses to it;
- B. To take advantage in this reflexive exercise of recent developments in social theory;
- C. To contribute to the development of tools for evaluating the impact of scientific research;
- D. To shape concepts for debating politics of science;

- E. To provide individual researchers and research organizations with the appropriate tools to analyse the contexts in which they operate, and to define their own line of action;
- F. Cross-cutting these different objectives: to pay particular attention to the relationship between specialists and non-specialists, as intersecting with other major societal divides.

Research perspectives and methodologies should include the development of meta-theoretical and methodological enquiry on:

- Empirical and inter/transdisciplinary research in general;
- Socio-legal research (regarding the central debates of the RG and the role of socio-legal enquiry itself); and
- Discourse and argumentation analysis.

## **GEC Expected Achievements for 2022**

### **New collective projects**

- ImpactPP – Proposta de Metodologia de Avaliação de Impacto da Bolsa Nacional de Alojamento Urgente e Temporário do Plano de Recuperação e Resiliência (DC-Iscte Coord.: Sérgio Caramelo)
- Impact-WEB-SIG – Monitorização e Avaliação de Impactos Territoriais das políticas públicas através de uma plataforma: Impact-WEB-SIG (DC-Iscte Coord.: Eduardo Medeiros)
- From Fenais to Fenais: Culture Programme for Local Development. Proponent: Iscte, PI: José Manuel Henriques. Funded by: Governo dos Açores. Total Budget: €64.4276,20.
- Proposta de elaboração e implementação dos Planos de Ação da candidatura das Operações Integradas Locais do Município de Loures no âmbito do PRR. DC-Iscte Coord: Nuno Dias, Joana Lages. Budget: €5210.

### **Collective projects (ongoing)**

- REVAL – Da desvalorização interna à revalorização do trabalho: o caso de Portugal (in articulation with IL Research Group), funded by FCT (Iscte, Coord: M. da Paz Campos Lima) (LT1);
- BARÓMETRO IV – Barómetro de Pessoas que se encontram em situação vulnerável – Fase IV, funded by EAEPN (Iscte, Coord: S. Costa, team: A. Castro, M. Santos) (LT2)

- RIPDA Portugal – Recherche Internationale sur le Droit des Personnes Âgées en Situation de Pandémie COVID 19)\_Portugal (Coord. REIACTIS, DC Team: Filomena Gerardo);
- Contrafactual-ML – Avaliação contrafactual dos apoios às empresas: cruzamento entre abordagens de inferência causal e de aprendizagem automática (Coord. DC-Iscte: Ricardo Mamede);
- Envelhecimento Cascais – Estudo, estratégia e plano sobre envelhecimento – velhice e políticas sociais no concelho de Cascais (Coord. DC-Iscte: Gustavo Sugahara).

### **Project proposals submitted for funding awaiting results**

- Avaliação e Monitorização do III PMIML – Plano Municipal para a Integração de Migrantes de Lisboa (2020-2022). Proponent: ISCTE; PI: Nuno Dias. ISCTE budget: €45.756,00, application result: awaiting results.
- Avaliação Ex Ante do POITD. Proponent: Iscte. PI: Ricardo Paes Mamede. Funded by: Autoridade de Gestão do Programa Operacional Competitividade e Internacionalização (COMPETE 2020). ISCTE Budget: €67650, application result: awaiting results.
- Care Work and Migrant Labour: Data, Regulation, and Training as Tools for Change. Proponent: ISCTE; PI: Nuno Dias; Co-PI: Maria Antónia Lima. Submitted to FCT.
- FINOUT – Outsiders financeiros: A Economia Política das Trajetórias Financeiras Marginais e Alternativas. Proponent: ISEG; DC Team: Ana Costa. Submitted to FCT.

### **Research contracts (under individual and institutional “Scientific Employment”)**

1. Nuno Dias

### **Ongoing PhD Theses**

#### ***Funded PhD Projects (ongoing)***

1. Carolina Henriques, Transdisciplinaridade em Estudos Urbanos: lógicas de produção de conhecimento e paradigmas emergentes, Supervisor: Teresa Costa Pinto (CT e GEC)
2. Patrícia André, O papel dos bancos cooperativos e mutualistas em Portugal. Supervisor: Sérgio Miguel Chilra Lagoa, Iscte

3. João Fialho, Cooperatives, Anarchism and the Commons. The Case of an Integral Cooperative, Supervisor: Ana Costa, Iscte

### **Non-Funded Individual PhD Projects (ongoing)**

- Abílio Martins Ferreira, Qual a importância das políticas públicas de investigação científica e tecnológica para o alicerçar da "Economia do Mar"?, Supervisor: Maria Eduarda Gonçalves, Iscte
- Amarílis Felizes, Observatório BIP/ZIP: Mediações digitais para o desenvolvimento local em Lisboa, Supervisora: Ana Costa, Iscte
- António Velez, Os movimentos sociais à volta da plataforma 15 de Outubro, Supervisor: Pierre Henri Guibentif, Iscte
- Carla Prino, Energy transition: Portugal in the recent European regulatory framework, Supervisor: Ana Costa, Iscte
- Cheng Zheng, An empirical study on credit evaluation of SMEs based on detailed loan data, Supervisor: Vasco Barroso Gonçalves, Iscte

- Sugahara, G., A contribute to the Age-friendly Movement: The case of Oslo, Healthy Ageing and Addiction, Space, OMT and Ageing: The Case of Norway

#### **4.4. TRANSVERSAL EXPECTED ACHIEVEMENTS FOR 2022**

Although the research carried out at the DC-Iscte is organized by research groups and thematic lines, there are no strict boundaries between them. Throughout this document, some examples of research products developed in articulation have been mentioned to illustrate this transversality. However, one of the objectives of the unit's Strategic Plan is to reinforce the disciplinary and scientific cross-dialogue through Integrative Thematic Lines (ITL). It is within this scope that some transversal initiatives arise, along with other elements whose scope covers the unit as a whole.

##### **Organization of scientific events**

- DC-Iscte Workshop 6<sup>th</sup> Edition (Spring 2022).
- International Conference Global Meeting on Law and Society | Rage, reckoning & remedy (co-organization) (July 2022).
- International Symposium Hints – Heritage Inclusive Tourism Symposium (co-organization) (May 2022).

##### **Collective projects at institutional level**

- Sociodigital Lab for Public Policies, Iscte.

##### **Individual proposals submitted for funding**

- 17 individual submissions to FCT Scientific Employment Stimulus Programme (5<sup>th</sup> edition) (awaiting results).

##### **Planned Publications**

- Gato, M. A., Guibentif, P. et al (coord.). eBook *Entre Transições: Retrospectivas – Transversalidades – Perspetivas* (Spring 2022).
